Claims 7 and 8 are objected to for containing the following obvious errors:

In claim 7, line 7, after "set", --of-- should be inserted. In claim 8, line 3, "attributes" should be changed to --attribute--.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371© of this title before the invention thereof by the applicant for patent.

Claims 1, 2, 6, 8, 9-14, and 19-23 are rejected under 35 U.S.C. 102(e) as being anticipated by Woolston. The patent to Woolston discloses a method for classifying an area rug (see col. 16, lines 54-55), the method comprising identifying a set of attributes that characterize area rugs, the attributes including category and condition (as specified in data display blocks 944 and 956, Fig. 13), determining possible values for each of the identified attributes, obtaining an image of the area rug (using camera 12, Fig. 1), inspecting the image, determining values for the set of attributes based on the inspection, and associating with the area rug a set of values (the bar code number discussed on col. 17, lines 37-39) for each one of the set of identified attributes.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person

Art Unit: 3765

having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

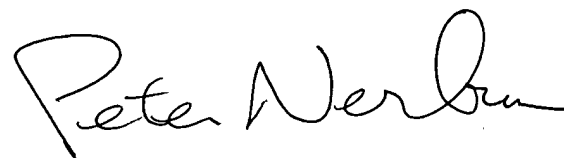

Claims 3-5 and 16-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Woolston in view of Burke. To store the images of Woolston at high resolution as suggested by Burke (at col. 4, lines 1-3) would have been obvious since the consumer may desire to see small detail of the image before deciding whether to buy the product.

Claims 7 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
